

MID-AUTUMN FESTIVAL 2026 · PROPOSAL V3

A Digital Bingo Card

Nine traditional lantern-festival games on one microsite — four played on the phone, five in the room, all solo and all quick to reset.

September 2026 · 45 minutes

STARTING POINT

Four Games, Nine Squares

WHAT THE CURRENT CARD DOES

Lantern Riddles	Scavenger Hunt	Find the Pair
Batik Painting	Lantern Riddles	Scavenger Hunt
Find the Pair	Batik Painting	Lantern Riddles

Each game is played three times over, so a full card means three visits to the same table.

Four manned tables cannot absorb the crowd inside a one-hour window.

Only the riddles read as Mid-Autumn; the rest could belong to any office party.

THE PROPOSAL

Nine Games, One Grid

4

games played on the
phone, marked
automatically

5

hands-on games, each in
a compact footprint

45

minutes end to end,
before the mooncakes

∞

players per digital station
— no queue forms

Every game is played solo, so nobody waits to be grouped, and every station resets in seconds — either several players go at once or a turn lasts under a minute.

THE CARD

The Bingo Matrix

Nine squares, nine different games, held on the player's own phone. Squares fill in as games are cleared.

■ Played in the microsite

■ Hands-on, stamped by a game master

The five hands-on games form a gold cross through the middle row and column. Every line on the card — across, down or diagonal — crosses it, so no one can win on phone games alone.

踢毽子

Shuttlecock Kick

寻月

Moon Photo Hunt

Four Games on the Phone

AUTO-MARKED · NO HOST · NO QUEUE

七巧板

Tangram Puzzle

Drag seven pieces into a rabbit, a boat or a lantern silhouette. The square clears when the outline is filled.

中秋知多少

Festival Quiz

Five questions on the customs — Chang'e, the pomelo, why the lanterns, why the fifteenth day of the eighth month.

玉兔配对

Find the Pair

Memory match on festival motifs — jade rabbit, osmanthus, pomelo, lanterns. Six pairs against a gentle timer.

寻月

Moon Photo Hunt

Upload three photos against a list: something round, something that casts a shadow, something jade-coloured. Feeds a live wall.

These four sit on the corners of the card, so a player can always start on the phone while a table is busy.

Five Hands-On Stations

ONE GAME MASTER EACH · ELECTRONIC STAMP

灯谜

Lantern Riddles

Riddle slips hang on a string of lanterns. Pull one and answer the game master aloud; two correct clears the square.

Footprint · a string of lanterns along a wall

Concurrent · unlimited, slips restocked

博饼

Mooncake Dice

Roll six dice against the game master's standing house rank. Three rolls to beat it.

Footprint · one round table

Concurrent · 4 bowls in rotation

投壶

Pot Pitching

Toss bamboo arrows into a narrow-necked pot from two metres. Three throws, one in clears the square.

Footprint · a 2 m lane against a wall

Concurrent · 3 pots side by side

夹豆子

Chopstick Transfer

Move lotus seeds bowl to bowl with chopsticks. Ten seeds in thirty seconds clears the square.

Footprint · one trestle table

Concurrent · 6 seats, one timer for all

踢毽子

Shuttlecock Kick

Keep the feathered shuttlecock up with the inside of the foot. Five kicks clears the square.

Footprint · a 3 m square of clear floor

Concurrent · 4 players, one shuttlecock each

Riddles and the dice bowl carry the sound of the festival, so they earn the room; craft stations stay out — a lantern-folding table needs a kit per person and cannot be reset for the next player.

Lantern Riddles 灯谜

HANDS-ON STATION · GAME MASTER STAMPS

HOW IT PLAYS

- 1** Pull a folded slip from the string of lanterns.
- 2** Read the riddle and give your answer to the game master aloud.
- 3** A wrong answer costs nothing — pull another slip and try again.

SETUP ON THE DAY

- A 3 m string of 20 paper lanterns at eye level, slips pegged along it
- A pool of 40 riddles, roughly 120 slips, restocked from a box under the table
- Answer key on a card kept with the game master

SQUARE CLEARS WHEN Two riddles answered correctly.

Mooncake Dice 博饼

HANDS-ON STATION · GAME MASTER STAMPS

HOW IT PLAYS

- 1 Read the house rank on the stand — the game master rolls it fresh every ten minutes.
- 2 Throw all six dice into the bowl. You have three rolls to beat the house.
- 3 Beat it and the game master calls your rank to the room and stamps the square.

SETUP ON THE DAY

- One round table with four porcelain bowls and four sets of six dice
- A printed rank chart, One Xiu through to Top Scholar, beside a stand showing the current house rank
- A small prize tin for anyone who rolls Top Scholar, and a house rank kept low enough that most players clear inside three rolls

RANK CHART

Top Scholar 状元	four 4s
Straight 对堂	1 through 6
Four Jin 四进	four of a kind
Three Reds 三红	three 4s
Two Ju 二举	two 4s
One Xiu 一秀	a single 4

Read top down; the house sits at Three Reds so most challengers clear.

SQUARE CLEARS WHEN A roll that outranks the house, within three tries.

Pot Pitching 投壺

HANDS-ON STATION · GAME MASTER STAMPS

HOW IT PLAYS

- 1 Stand behind the taped line, two metres from the pots.
- 2 Throw three bamboo arrows underarm, one at a time.
- 3 The game master clears the arrows between players.

SETUP ON THE DAY

- Three narrow-necked pots set against a wall, floor tape marking the line
- Nine blunt bamboo arrows
- A mat behind the pots so stray arrows do not bounce into the room

SQUARE CLEARS WHEN One arrow landed in a pot.

Chopstick Transfer 夹豆子

HANDS-ON STATION · GAME MASTER STAMPS

HOW IT PLAYS

- 1** Six players sit down, each with a full bowl and an empty one.
- 2** On the game master's call, move lotus seeds across one at a time.
- 3** At thirty seconds everyone stops and counts aloud.

SETUP ON THE DAY

- One trestle table, six seats, twelve bowls and six pairs of chopsticks
- Half a kilo of dried lotus seeds, topped up between rounds
- A single visible timer that runs for all six seats at once

SQUARE CLEARS WHEN Ten seeds moved in thirty seconds.

Shuttlecock Kick 踢毽子

HANDS-ON STATION · GAME MASTER STAMPS

HOW IT PLAYS

- 1 Take a shuttlecock from the basket and stand anywhere inside the taped square.
- 2 Keep it up with the inside of the foot while the game master counts aloud.
- 3 Prefer company? Ten kicks passed around a circle of three counts the same.

SETUP ON THE DAY

- One basket of six feathered shuttlecocks, refilled from a spare bag
- A three-metre square of clear floor marked with tape, away from the food tables
- The game master counts, retrieves strays and keeps four players spaced apart

SQUARE CLEARS WHEN Five kicks in a row, or ten around a circle of three.

Tangram Puzzle 七巧板

PLAYED ON THE PHONE · MARKED AUTOMATICALLY

HOW IT PLAYS

- 1** Open the tile and a silhouette appears — a rabbit, a boat or a lantern.
- 2** Drag and rotate the seven pieces to fill the outline.
- 3** Pieces snap into place once they are close enough.

WHAT WE BUILD

- Three silhouettes in the build, one assigned at random per player
- Generous snap tolerance so it works on a small screen
- A hint button that outlines the next piece after ninety seconds

SQUARE CLEARS WHEN One silhouette completed.

Festival Quiz 中秋知多少

PLAYED ON THE PHONE · MARKED AUTOMATICALLY

HOW IT PLAYS

- 1 Five multiple-choice questions, one to a screen.
- 2 Answer, then read the short note explaining it.
- 3 No retries — the note is the reward, not the score.

WHAT WE BUILD

- A bank of fifteen questions on the festival, five drawn at random
- A one-line cultural note written for every answer
- Questions reviewed by the committee before the event

SQUARE CLEARS WHEN Three of five answered correctly.

Find the Pair 玉兔配对

PLAYED ON THE PHONE · MARKED AUTOMATICALLY

HOW IT PLAYS

- 1 Twelve tiles sit face down on the screen.
- 2 Tap two to flip them; a match stays open.
- 3 Mismatches turn back over after a moment.

WHAT WE BUILD

- Six motifs drawn for the deck: jade rabbit, osmanthus, pomelo, lantern, mooncake, full moon
- A ninety-second timer with an unlimited restart
- Motif art reused from the card design so the deck looks of a piece

SQUARE CLEARS WHEN All six pairs found.

Moon Photo Hunt 寻月

PLAYED ON THE PHONE · MARKED AUTOMATICALLY

HOW IT PLAYS

- 1 The tile shows three prompts drawn from the hunt list.
- 2 Photograph each one anywhere in the venue.
- 3 Upload them and watch them land on the live wall.

WHAT WE BUILD

- A prompt list of a dozen items — something round, something that casts a shadow, something jade-coloured
- An upload endpoint with a light moderation queue for the site operator
- The wall projected beside the prize table

SQUARE CLEARS WHEN Three photos uploaded.

Scan, Play, Stamp

01

Scan to register

A QR code at the door opens the site in the browser. Name and school only — no app, no account.

02

Get a shuffled card

Phone games shuffle around the corners and tables hold the gold cross, so every card is different but balanced.

03

Clear squares

Four tiles open a game in the browser and mark themselves. Five need a table visit.

04

Take the stamp

The game master scans the player's card code on their own phone; the tile stamps instantly.

Every line — across, down or diagonal — passes through the gold cross, so no card wins on phone games alone.

A live board on the projector shows completed cards as they come in.

Paper cards kept at the desk as the fallback if the wifi misbehaves.

OPTIONAL TENTH TABLE

Batik Painting

We have kits left over from the earlier event, so the cost is already sunk. Batik is not a lantern-festival tradition, though, so it sits beside the grid rather than inside it.

Runs as a quiet corner; the floater stamps it when a piece is finished.

A batik stamp substitutes for any one square on the card — a wild tile.

Drop it entirely if the venue cannot take wet materials near the food.

WILD TILE

Counts as any one square

Useful for anyone who would rather sit out a physical station, and it gives late arrivals a way onto the board.

LOGISTICS

Eight People, Eight Roles

Pot Pitching

Game master: keeps the lane clear, retrieves arrows, stamps on a hit.

Lantern Riddles

Game master: restocks the slips, hears the answers, stamps two correct.

Chopstick Table

Game master: runs one thirty-second timer for all six seats, then stamps.

Mooncake Dice

Game master: rolls the house rank every ten minutes, calls each challenge, stamps a win.

Shuttlecock Kick

Game master: counts the kicks, forms circles of three when the queue grows, stamps a clear.

Emcee & Door

Points arrivals at the QR code, briefs the room, calls bingo and presents prizes.

Site Operator

Watches the live board, fixes stuck cards, issues the paper fallback if needed.

Floater

Batik corner, event photos, and relief so game masters get a break.

TIMING

Run of Show

5'	Scan In	Rolling registration at the door — one QR scan, card generated on the spot.
3'	Briefing	A word on the festival, three sentences of rules, and the floor opens.
32'	Open Play	Nine games live at once; players move between phone and tables at their own pace.
5'	Prize Presentation	Winning lines read off the live board and prizes presented to the room.

Forty-five minutes end to end, before the mooncake session begins.

TO CONFIRM

Next Steps

Sign off the nine games and the five-physical, four-digital split.

Confirm headcount and venue wifi before the site is built.

Decide whether batik stays as the wild tile.

Dry-run the scan-and-stamp flow with the eight of us a week ahead.
